

## Visit us and taste Barbeito Madeira wines!

Visit our winery, where we combine the tradition and innovation, the past and the present.

Your visit will start with a guided tour to our winery, where you will learn about the wine making process at the same time you will get to know our specificities and also our machinery, as for example the Robotic Lagar. A guide will explain you everything from the grape reception to the final product and also show you the warehouse where the wines are aged in old oak casks.

After the visit you will have the chance to taste **10 wines, aged from 5 to 20 years old**, in our **Tasting and Memories Room**. In this room you will find all of our wines and also a wide range of documents and memories from our company since its foundation in 1946.

### Contact us...
